

HEC-WAT RiverWare Plugin

Release Notes

Center for Advanced Decision Support for Water and Environmental Systems (CADSWES)

Version 1.0 – Released October 6, 2020

This is the initial release of the WAT RiverWare Plugin. The following features are included in version 1.0 of the WAT RiverWare plugin:

- Import RiverWare model alternatives into a study, selecting the model file and SCTs, and selecting the plots, charts, output canvases and scripts to be displayed in the HEC-WAT user interface.
- Create program orders containing RiverWare.
- Create alternatives and simulations containing RiverWare.
- Link RiverWare with its upstream and downstream models.
- Perform the RiverWare simulations as part of a Compute.
- Open the workspace, diagnostic window, RPL sets, SCTs, plots, charts, output canvases and scripts from the HEC-WAT user interface.

Note that Flood Risk Analysis (FRA) computes and output variables aren't supported in this version of the adapter.
